Projects

GetJob

GetJob is a web app for people who are seeking jobs and companies that want the best employees. It is a platform for companies to post their jobs, and job seekers to apply for those jobs. GetJob was built utilizing Ruby on Rails, JavaScript, Angular, HTML/CSS, and SQL. This app was inspired by how in our country Rwanda, there is a big number of people who are completing their education, and to find a job for them is so hard. So, by using my web app, it will be easy for them to get job online.
